DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 9-10 are rejected under 35 USC § 102(b) as being anticipated by Hutter et al. (“Hutter”) U.S. Patent No. 6,033,946.

With regards to claim 1, Hutter illustrates in figures 1A-8, particularly figure 8, (entire document) a semiconductor substrate 12 of a first conductive type P; first and second regions 48 of a second conductive type N opposite to the first conductive type, wherein said first and second regions 48 are provided in a surface of said semiconductor substrate 12 in a predetermined interval; a third region 35 of said first conductive type which is provided between said first and second regions in said surface of said semiconductor region; and a fourth region 30 of said first conductive type which is provided below said third region inside said semiconductor substrate to cover the whole of bottom of said third region at least.

With regards to claims 2 and 10, Hutter illustrates in fig. 8 a position of an impurity peak concentration of said fourth region 30 into a depth direction is deeper than a peak position of an impurity concentration in each of said first and second regions 48 into the depth direction.

Art Unit: 2815

With regards to claim 9, Hutter illustrates in fig. 8 a fourth region 30 of said first conductive type which is provided below said first to third region 35, 48 inside said semiconductor substrate to cover the whole bottoms of said first to third regions.

Allowable Subject Matter

Claims 3-6, 11-14 and 17-19 are allowed.

Response to Arguments

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., wells, i.e., regions in which a circuit element, for example a MOSFET, are formed) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2815

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
